

Acoustic Granulate Panels

60 mm thickness

- These panels are used to build walls that separate apartments or partition walls that are subject to high sound insulation requirements.
- Sound insulation is higher than 60 dB.
- The 35/60/85 mm thick panels are suitable for 50/75/100 mm thick profiles.
- It is very easy to install them even when working alone.
- The panels can be installed between wall profiles spaced either 600 mm or 400 mm apart, both vertically and horizontally. They can be cut with a sharp, steady construction knife. Channels for electrical cables can also be cut using a construction knife.

Technical characteristics

Measurements	600x400x60 mm
Weight	9,5 kg
Raw materials	SBR granules, polyurethane adhesives. Non-toxic
Warranty	2 years
Exploitation	For outdoor and indoor use
Maintenance	Easily washable with water. High-pressure washing is not recommended
Installation	Installed between wall profiles spaced 600 or 400 mm apart (can be placed both vertically and horizontally)
